N SCALE PRESIDENTIAL SERIES

AVAILABLE SEPTEMBER 2008!

George Washington's
campaign button

* Artwork for representational purposes only.

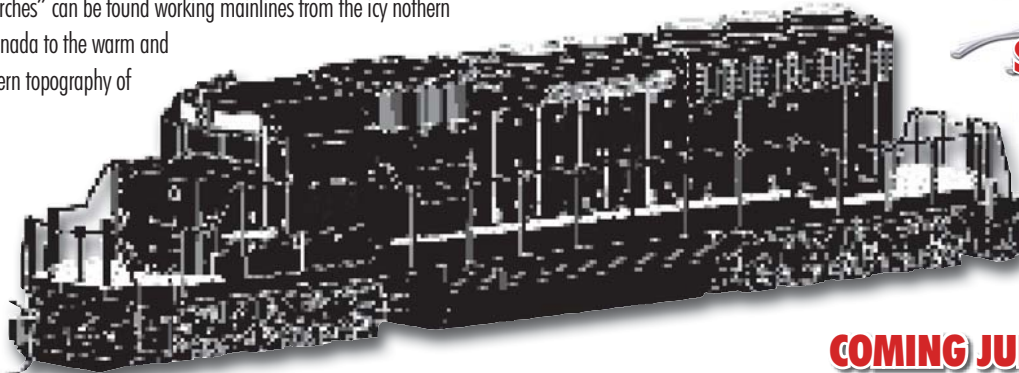

Micro-Trains is bringing an exciting new series to N scale collecting with the Presidential Series. The series will begin with the first president of the United States, George Washington. Each car will feature the Presidential Seal, the president's portrait, and the American flag as it was at that time. Each release will also include a one inch diameter campaign button for that particular president! Cars will be released each month in the same order of their presidency. Don't miss out on this popular series; place your order with your dealer today!

#074 00 101...\$23.95

NEW SD40-2 Loco in Z Scale!

The EMD SD40-2 was built by General Motors' Electro-Motive Division between 1972 and 1986 and proved to be one of the best selling diesel locomotives built to date. EMD delivered 3,957 units driven by a 3,000 horsepower diesel-electric powerplant to most of the large and intermediate railroads in North America. Even after 35 plus years of operation, the SD40-2 with its distinctive front and rear "porches" can be found working mainlines from the icy northern regions of Canada to the warm and varied southern topography of Mexico.

COMING JULY 2008

Artwork used for representational purposes only.
